LITTLE BEAVER®
EARTH DRILLS & AUGERS

AUGERS, EXTENSIONS POINTS, AND BLADES

From soil sampling to fence posts, Little Beaver augers meet the demands of virtually any digging challenge in nearly any soil type. With standard, carbide and heavy-duty points and blades designed for specific soil conditions, you can dig faster and more efficiently no matter what you're up against. Augers are available in 1.5- to 16-inch diameters and in lengths from 36 to 60 inches, and you can quickly attach them to Little Beaver's mechanical and hydraulic earth drills with our hassle-free, spring-loaded, snap-on connection. For applications that require digging deeper than 4 feet, we also offer 18- and 36-inch extensions.

AUGERS

STANDARD SNAP-ON

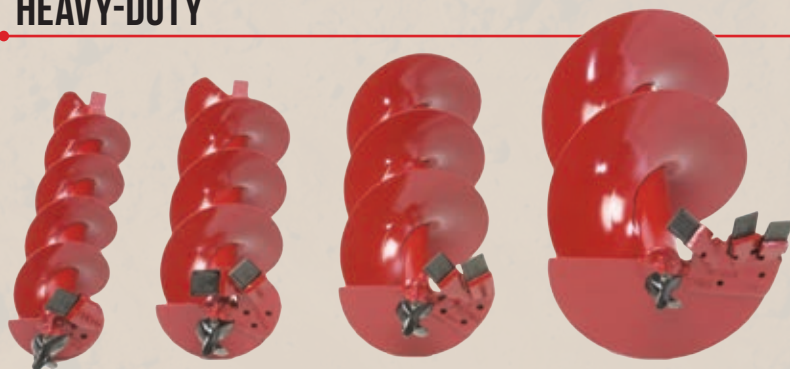

Our standard augers feature a spring-loaded snap-on connection that makes securing them to the auger head easier and more convenient. Best of all, you'll never forget a pin again. The augers' replaceable, reversible blades power through tough soil conditions and heavy-duty flighting stands up to the harsh effects of drilling.

Diameter Sizes: 1.5" 2" 3" 4" 5" 6" 7" 8" 9" 10" 12" 14" 16"

Lengths: 36" 42"

HEAVY-DUTY

These augers feature rugged flighting, heavy-duty teeth and side cutting blades that quickly cut through tough, rocky soils. The augers can be used with 20:1 or 13:1 gear ratio transmissions and should be operated at slower RPMs than standard augers for optimal results.

D-SERIES

We designed our D-Series augers exclusively for use with the powerful Big Beaver Drill Rig. They feature robust flighting, solid construction and superior durability. Attach the auger to the drive head with the pin and clip, and you'll get a secure connection and hassle-free drilling.

Diameter Sizes: 4"-18"

Lengths: 36", 48" or 60"

SMALL DIAMETER HEX

Little Beaver Small Diameter Hex augers are ideal for geotechnical and environmental soil sampling. The system allows for quick connection of extensions for deeper drilling.

Diameter Sizes: 1.5" 2" 3"

Lengths: 36" 42" 48" 60"

POINTS AND BLADES

STANDARD POINTS AND BLADES

STANDARD

Little Beaver's standard points and blades are ideal for drilling in clay and dirt. They bolt on and can be reversed and reused.

Blade Sizes: 4" 5" 6" 7" 8" 10" 12" 14" 16"

Point Sizes:
one size for 4-12"; one size for 14-16"

Screw-On Point Sizes: 1.5" 2" 3"

CARBIDE

For fast, efficient digging in hard clay, abrasive soils and frozen ground, equip your Little Beaver augers with durable carbide blades that cut the material into small pieces rather than digging.

Standard Snap-On Auger Sizes:
1.5" 2" 3" 4" 5" 6" 7" 8" 9" 10" 12" 14"

Hex Auger Sizes: 1.5" 2" 3"

HEAVY-DUTY POINTS AND BLADES

When soil conditions get rocky, our heavy-duty points and blades will help you power through. They can be paired with heavy-duty augers and feature an aggressive design that quickly breaks up soil for fast, efficient digging.

								
Standard Point	Carbide Tip Point	Standard Dirt Blade	Hardfaced Blade	Carbide Tip Blade	Carbide Insert Blade	Chisel Point Blade	Chisel Point with Carbide Blade	Rubber Lock

EXTENSIONS

FULL-FLIGHTED EXTENSIONS

When drilling deeper than 4 feet, Little Beaver's full-flighted extensions quickly pull cutting spoil to the surface to leave a clean hole. They attach easily to any Little Beaver auger with a secure, spring-loaded, snap-on connection.

Diameter Sizes:
3" 4" 5" 6" 7" 8" 9" 10" 12" 14"

Lengths: 18" and 36"

TUBE EXTENSIONS

Use lightweight tube extensions with any size standard auger for digging deeper than 4 feet. They feature a secure, spring-loaded, snap-on connection for quick and easy attachment to any Little Beaver auger.

Lengths: 18" and 36" (fit any size auger)

D-SERIES EXTENSIONS

All D-series augers and extensions feature solid top construction and connect with a drive pin for a stronger connection when drilling at deeper depths. They are designed for use with the Big Beaver Drill Rig.

Diameter Sizes: 4"-18"

Lengths: 36" 48" 60"

FEATURES AND BENEFITS

AUGERS

ADAPTABILITY

Bore through a wide range of soils and materials efficiently with replaceable standard points and blades, carbide blades or heavy-duty teeth.

DURABILITY

Enjoy the durability and dependability that results from heavy-duty construction and durable powder coat finish.

VERSATILITY

Tackle nearly any drilling project with durable augers available in a variety of diameters and lengths.

POINTS AND BLADES

LESS WEAR

Prevent excessive wear on the auger fluting with side-mounted cutting blades that power through the earth.

LONGER LIFE

Get more life out of blades that can be reversed and reused.

IMPROVED EFFICIENCY

Match durable points and blades perfectly to ground conditions and soil types for effective cutting.
