EARTH DRILLS & AUGERS

HORIZONTAL BORING KITS

HORIZONTAL BORING KITS

Little Beaver Horizontal Boring Kits turn a Mechanical Earth Drill into a powerful and cost-effective horizontal boring machine.

The sidewalk boring kit allows for dry boring up to 5 feet and the driveway boring kit uses wet drilling to bore up to 50 feet.

Ideal applications:

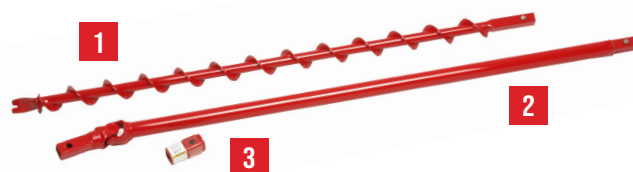

- Landscape Lighting Installation
- Sprinkler System Installation
- Water Softener Line Installation
- Gas Line Installation

SIDEWALK BORING KIT

The Sidewalk Boring Kit uses a 3-inch diameter auger and wiggle joint extension to quickly bore under sidewalks up to 5 feet wide. Since the torque tube is not used with this kit, a horizontal drill key is included to bypass the engine kill switch.

Drill Bit Size: 3 in.

1. 3 in. by 5 ft. sidewalk auger
2. 2 in. by 5 ft. wiggle joint extension
3. Horizontal drill key

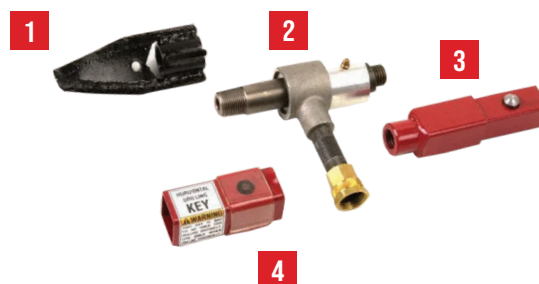

DRIVEWAY BORING KIT

The Driveway Boring Kit is used for horizontal boring under driveways or parking lots up to a distance of 50 feet. The kit consists of a water drill bit, swivel adapter, swivel assembly and a horizontal drill key. To complete the kit, operators will need to provide a garden hose, ¾-inch Schedule 80 water pipe and ¾-inch pipe collar. The water running through the water pipe and water swivel sprays out of the drill bit, flushing the cuttings from the borehole.

Drill Bit Size: 2 in., 3 in., 4 in.

1. Water drill bit
2. Water swivel assembly
3. Water swivel adapter
4. Horizontal drill key
